

INTERFACE PANEL TOUCH V4

The world of UltraCam at your fingertips

The Interface Panel Touch (IPT) v4 is Vexcel's advanced tablet PC engineered for controlling UltraCam and UltraNav systems during flight. Fully compatible with 4th generation UltraCam systems, it comes pre-configured as a camera, UltraNav, or LiDAR interface. Featuring a 10.1-inch display with superior brightness levels optimized for sunlight readability, the IPT v4 ensures that operators maintain a clear view under all conditions. Designed to streamline

operations, it offers efficient cable management and hassle-free installation options in the aircraft, utilizing either the versatile standardized Vesa mount or Vexcel's trusted quick-release system, previously available on the IPT v3. This combination of enhanced functionality and user-friendly design provides operators with the best support for efficient and effective aerial data collection.
