ULTRACAM OSPREY MARK 3 PREMIUM

Photogrammetry meets oblique

ULTRACAM OSPREY MARK 3 PREMIUM

We have you covered from all angles

Designed for maximum flexibility, the UltraCam Osprey Mark 3 Premium extends a full photogrammetric nadir camera with oblique capture capability in four directions.

More than a standard camera, the UltraCam Osprey offers cutting-edge technology to collect photogrammetry-grade nadir images (PAN, RGB and NIR) and oblique images (80 Mega pixel RGB) simultaneously, supporting city mapping as well as classical nadir applications from the same flight mission. Additionally, the unique camera design of the UltraCam Osprey Premium enables generation of imagery based high-resolution point clouds. The result are dense, consistent and aligned data sets. The nadir and oblique camera channels

are designed and oriented such that the full nadir footprint of 13,470 pixels can be leveraged. Meanwhile, oblique image characteristics such as resolution and overlap are well aligned. The combination of these factors leads to best-in-class flight collection efficiency.

By offering automated features such as nadir and oblique color balancing, nadir and oblique AT, dense point cloud generation, DTM/DSM generation as well as 3D model generation through UltraMap, the UltraCam Osprey Premium is taking photogrammetry to new levels.

ROBERT CHENG
ULTRACAM OSPREY CUSTOMER

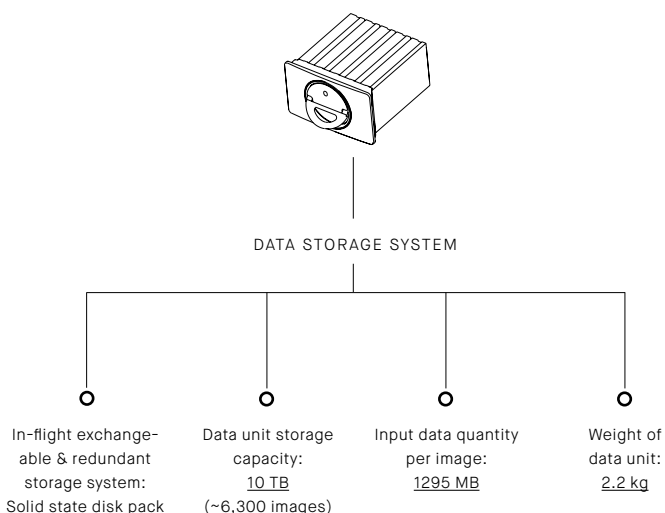

“UltraCam Osprey, simple-to-use but versatile enough to meet both the present and future requirements of our company. Two weeks after the initial training, we were able to produce orthomosaic images and 3D city models already.”

Specifications & details

Technical changes, printing errors, mistakes and amendments reserved.

SENSOR SYSTEM

View	Parameter	Value	Parameter	Value
Nadir	PAN image size	13,470 x 8,670 pixels	Imaging sensor	CCD
	PAN physical pixel size	5.2 µm	Shutter (longlife central leaf)	1/750 to 1/64
	Color capability (multi-spectral)	4 channels - RGB Bayer pattern & NIR	Forward-motion compensation (FMC)	TDI controlled
	Color image size	6,735 x 4,335 pixels	Maximum FMC capacity	50 pixels
	Color physical pixel size	5.2 µm	Frame rate (minimum inter-image interval)	1 frame per 1.75 seconds
	Pansharp ratio	1 : 2	Dynamic range	> 72 db
			Analog-to-digital-conversion at	14 bits
Oblique	Color capability	3 channels - RGB Bayer pattern		
	Color image size	10,300 x 7,700 pixels		
	Color physical pixel size	5.2 µm		

¹ For separated housing concept options please contact our sales team.

LENS SYSTEM

View	Parameter	Value	View	Parameter	Value
Nadir	PAN lens system focal length	80 mm	Oblique	Color (RGB Bayer pattern) lens system focal length	120 mm
	PAN lens aperture	f=1/5.6		Color (RGB Bayer pattern) lens aperture	f=1/4.4
	Color (RGB Bayer pattern & NIR) lens system focal length	40 mm		Total field of view, across track	45° (+9.5° / -15.7°)
	Color (RGB Bayer pattern & NIR) lens aperture	f=1/5.6		along track	45° (+9.5° / -9.5°)
	Total field of view, across track	47.3°			
along track	31.5°				
Flying height for RGB pixel size @ 10 cm GSD	1,538 m				

OPERATIONAL SPECIFICATION

<p>Flight altitude: ≤ 7000 m</p>	<p>Humidity: 5 % to 95 % <u>no condensation</u></p>	<p>Temperature: 0 °C to +45 °C <u>(operation, computer stack)</u> -20 °C to +45 °C <u>(operation, sensor stack)</u> -20 °C to +65 °C (storage)</p>	<p>Mounting: UltraMount (GSM, 4000, SSM 350L & SteadyTrack LG) and most current third party mounts²</p>	<p>GNSS/INS/FMS system support: UltraNav (Applanix POSTrack OEM) and most current third party systems²</p>	<p>Data processing: UltraMap processing suite including data export in standard formats</p>

BENEFIT FROM OUR TECHNOLOGY

When you partner with Vexcel Imaging,
you get more than a camera.

You get cutting-edge technology combined with a progressive
service concept for constant product upgrades, world-class
support and one-stop solutions.

Today and tomorrow.
